PROFESSIONAL SUMMARY

Mobile developer with more than one year of experience of developing mobile applications in Flutter. Familiar with integrating REST API, web socket, and SQLite database into apps. Analytical and structured in coding, regularly reviewing co-worker's code and making them more readable.

EXPERIENCE

Mobile Developer, Wesclic Indonesia Neotech

June 2024 – Present

- Developed ridesharing app Zendo from UI slicing to REST API integration. The resulting app has features such as order creation, order history, and map integration.
- Developed social media SUMU App from UI slicing to REST API integration. The resulting app has features such as profiles, posts and forums creation and editing.
- Reviewed interns' Flutter code and gave inputs to improve them in GitHub. Prevented bugs and redundant code from being merged into the repository.
- Coordinated with quality assurance staff and project managers to fix bugs in client's apps.

EDUCATION

Android Kotlin Bootcamp, Xsis Academy

September 2023 – November 2023

- Practiced developing Android applications using Kotlin and XML. This culminated with a team project where we developed an app integrated with an SQLite database.
- Practiced Jetpack Compose in spare time. Created a simple card game integrated with Firebase Realtime Database as a result.

Bachelor Degree, Computer Science, Universitas Gadjah Mada

August 2019 – October 2023

- Wrote a thesis on classification using machine learning. Built LSTM and GRU models in Python to do so.
- Built basic web pages in HTML and CSS during software engineering classes.

SKILLS

Flutter, REST API, web socket, SQLite, Git, Kotlin Android, Python, English, HTML, CSS
